

How We Got The Project Going & How We Are Doing It?

Assessing, Planning, & Prioritizing

Cal-EPPC Symposium

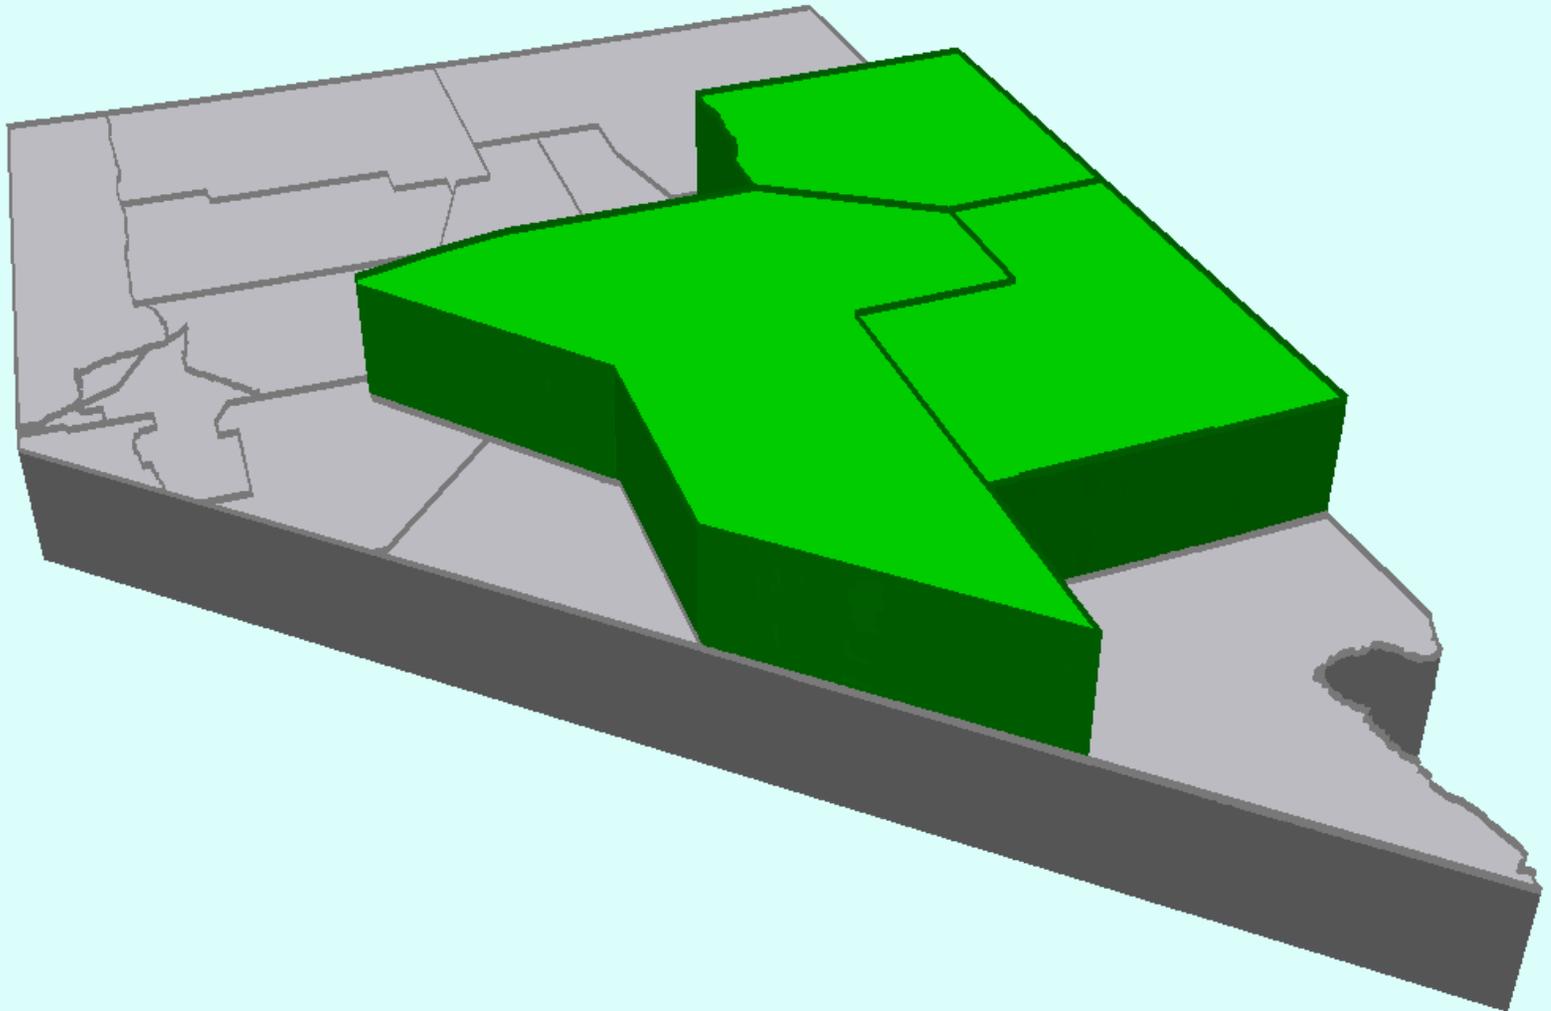

Oct. 2, 2003

Robert E. Wilson
Brandon Vaught

Tri-County Weed Program

23, 460,480 Acres

Putting the Pieces Together

To Conduct Weed Management
Over A Large Landscape

Collaboration

- Partnership, Collaboration, Communication, Coordination Toward a Common Vision
- Inter-Jurisdictional Issues Such as the Spread of Invasive Weeds Are Addressed With Partnerships

Organization

- Counties
 - White Pine County
 - Lincoln County
 - Nye County
- Conservation Districts
 - White Pine Conservation District
 - Lincoln Conservation District
 - Tonopah Conservation District
 - Southern Nye Conservation District

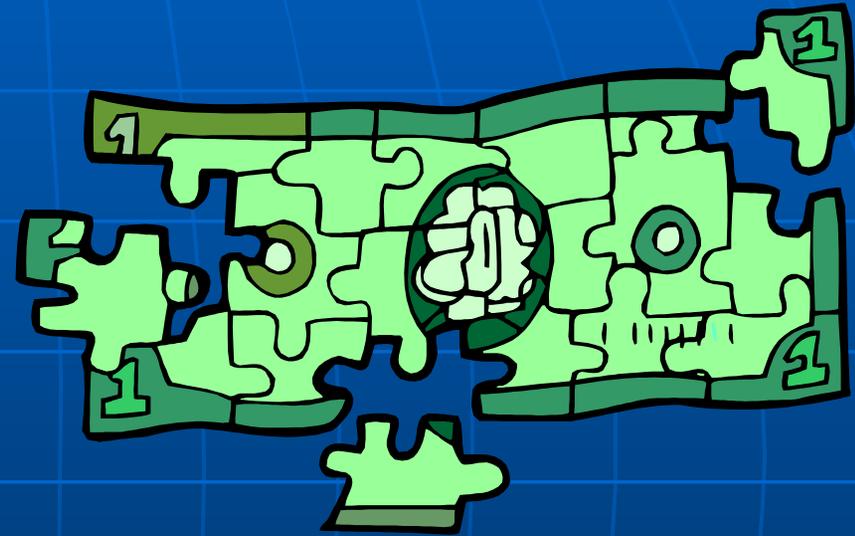

Organization

- Federal Agencies
 - Bureau of Land Management
 - Forest Service
 - Fish and Wildlife Service
- Tribes
- State Agencies
 - Division of Wildlife
 - Division of State Parks
 - Department of Transportation

Tri-County Weed Program

- Landowner Funded
- No Tax Levy
- Agency Participation
- Mostly Voluntary Participation
- Strongly Supported Throughout Area

Cooperative Weed Management Areas (CWMA's)

Local Groups that Have
Agreed to Work
Together to Combat
Invasive Weeds

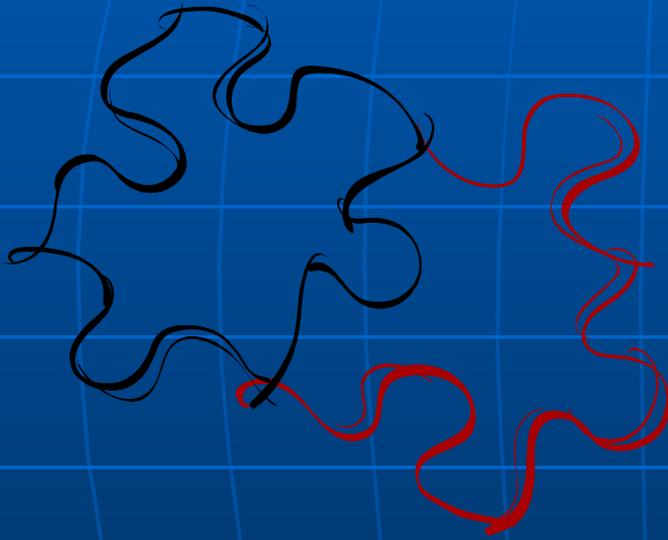

CWMA's

- Where Landowners Come Together
- Boundaries Flexible & Self-Defined
- Bottom Up Priorities
- Individual Ownership of Vision/Process
- Allows Spending Federal Funds on Private Properties
- Instrument to Funnel Resources
 - Comprehensive Prioritization of Work
 - More Efficient Strategy

Requires

- Flexibility
- Efficiency
- Patience
- Persistence

Flexibility

- Open Minded
- Establish Priorities But Remain Flexible
- Be Willing To Give Up Some Control
- Collaboration Adds Complexity
 - Financial
 - Legal
 - Social
 - Procedural

Efficiency

- Systematic
- Technology Based
- Use Laws/Rules To Advantage

Patient

- Mistakes Will Be Made
- People and Personalities Change
- Credibility is Earned
- Trust is Built By Results
- Politics/Control Will Effect Your Program
- Money Will Always Be Insufficient, But Will Be Adequate For the Credibility Earned
- People Learn And Accept Change At Different Rates

Persistence

- Energy/Interest Starts High, But Declines With Time
- Maintain Energy With Ownership And Accomplishments
- Maintain Interest With Shared Decision Making And Responsibility
- Keep On Truckin'

Technology Use

Technology Use

- Expands Our Capability to Manage Weeds
 - Data Collection using Computers and GPS
 - Collection during Inventory and Treatments
 - Handhelds with Data Dictionary
 - Vehicle Mounted Complete Units
 - GIS Software and Capabilities
 - Information Collection Mechanics
 - 24K Base Map under Real Time Data Collection
 - Transfer from Mobile Units to GIS

Data Uses For Management

- GIS Format Exportable to Other Users
- Real Time Information During Inventory and/or Treatment
- Current Verification/Quality Control
- Visually Measure Progress
- Measures Changes Over Time
- Provides for Future Modeling

Data Provides Accountability

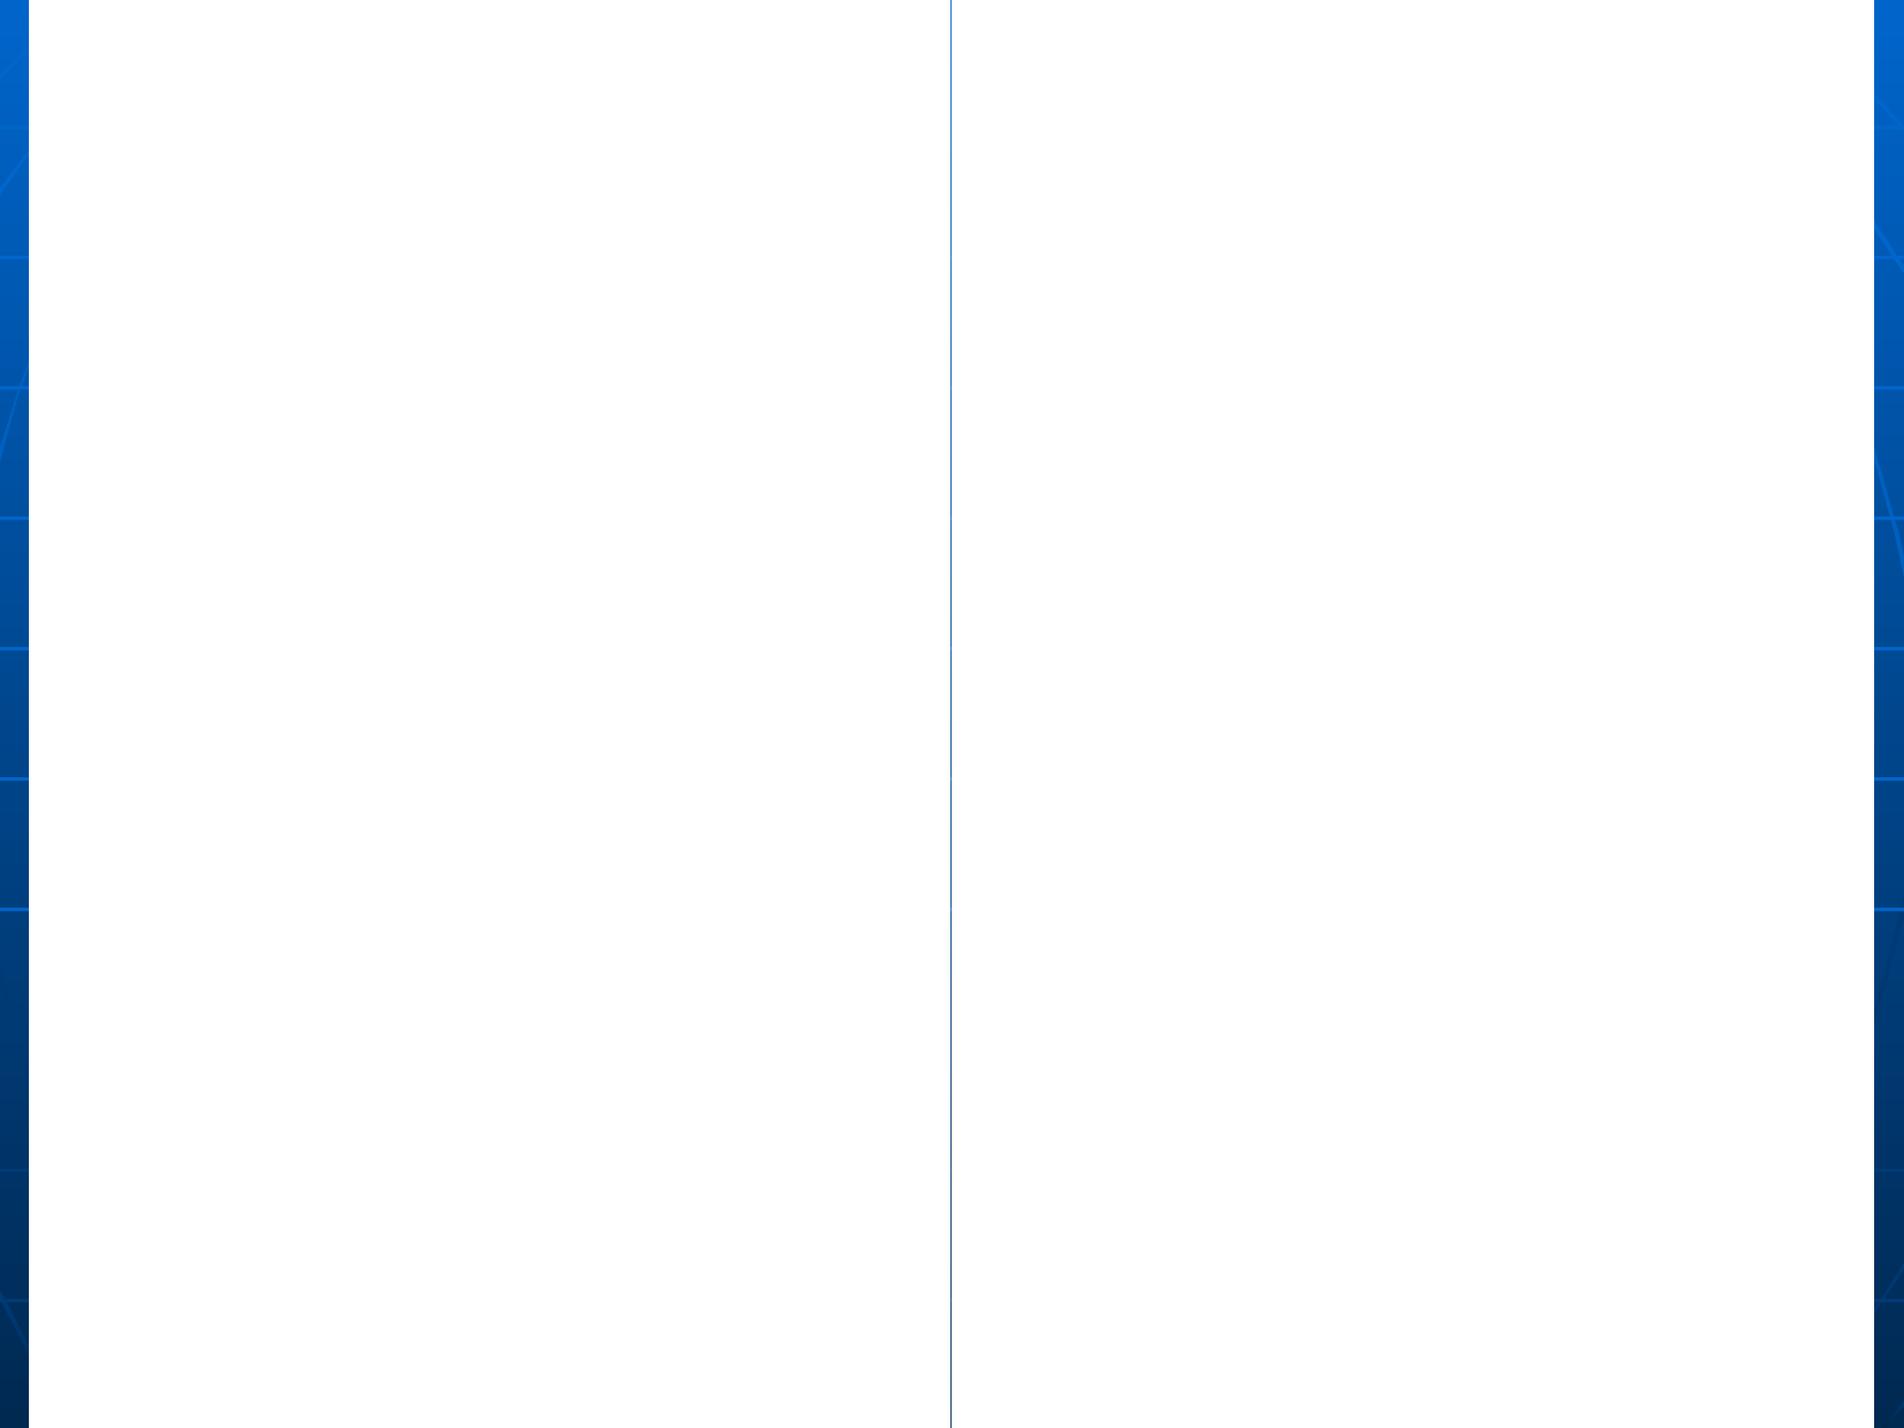

- Site Specific Herbicide Use
- Site Specific Treatment Areas
- Previous Data Provides High Confidence of Treatment Conclusions
- Specific Individualized Financial Accountability By:
 - Location
 - Treatment
 - Other Information as Needed

Control Efforts

Inventory

- Sites with High Probability of Weeds (Hot spots)
 - Transportation Systems
 - Disturbed Areas
 - Riparian Systems
- Randomly Selected Areas
- Verification with Independent Checks

775-889-4457 775-761-5799

Priorities

- **Healthy Rangelands** (Education & Management)
- **New Weed Infestations** (Newly introduced)
- **Outlying Small Weed Populations**
- **Transportation Corridors** (Roads, Utilities)
- **Weed Dispersal Mechanisms** (gravel, hay)
- **Containment of Large Weed Infestations**
- **Control Large Weed Infestations**
- **Site Restoration**

Direct Targeted Controls

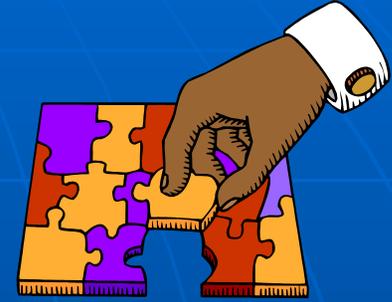

- Herbicides
 - Application Method
 - Application Rate
 - Application Timing
 - Target Species
- Grazing
 - Target Species
 - Timing (Frequency, Duration, Stage)
- Biological Control Agents

Indirect Controls

- Range Management
 - Revegetation When Necessary
 - Vegetation Manipulation
 - Vegetation Use Levels
- Multiple Use Considerations
 - Disturbance Events
 - Use Levels
 - Isolation of Activity

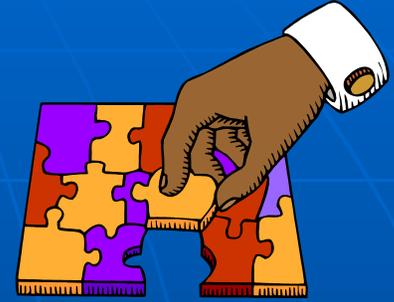

Tri-County Weed Program
Organization Keeps Records
Complying With All Laws
And Regulations
Except Those Unique to
Individual Partners

Lessons Learned

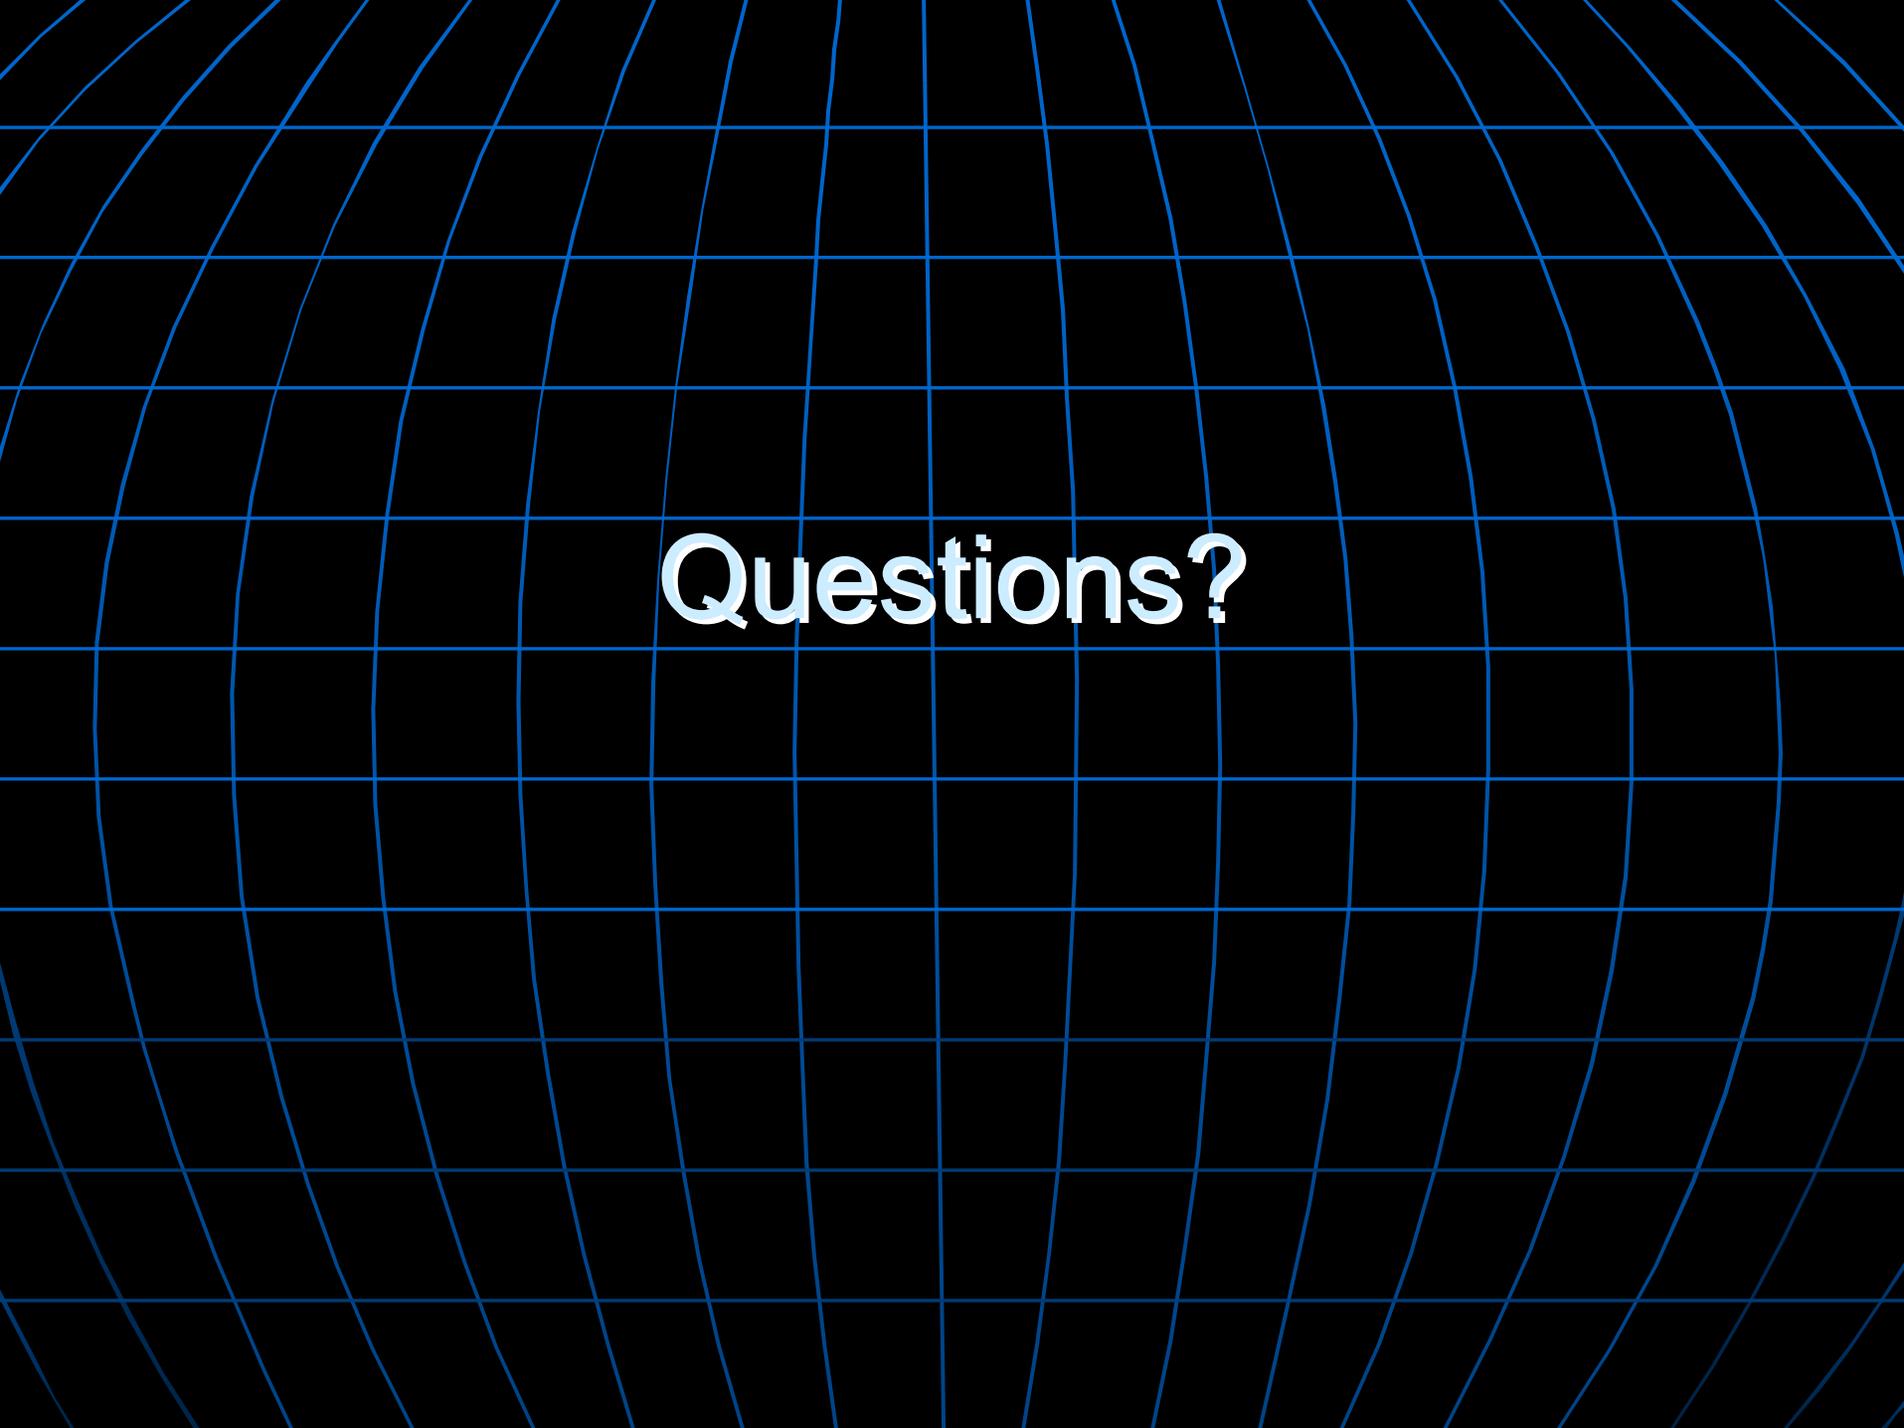

- Social Issues
 - More Weeds Than Current Estimates
 - Individual Responsibility
 - Personal Ownership of the Problem
 - County Liability Issues
 - Retaining Momentum
 - Education Needs
 - Presence At Community Events

Lessons Learned

■ Social Issues

- Communication Throughout The Program (What is Going On?)
- When New Groups Form; Each Start At The Beginning
- Enhancement of Progress Toward Goals By All The Partners

Questions?
