NNF & Prop 84 Big Tujunga Projects

In late August 2009, an arson-caused fire ignited in the Angeles National Forest, just north of the city of Los Angeles. In days, the Station Fire grew to become the largest fire in L.A. County's history, burning more than 161,000 acres – 25 percent of the Angeles National Forest. The fire affected four watersheds, decimated forests, and severely impacted both public and private infrastructure.

The LA Corps through Grants from the National Forest Foundation & the CCC Prop 84 is helping to restore this section of forest with the rebuilding of trails and the removal of invasive plant species

NNF & CCC Prop 84 Big Tujunga Projects

Big Tujunga Projects

- Restoration of trails and the removal of invasive species within the burned areas of the Station Fire

NNF & Prop 84 Big Tujunga Projects Removal of Spanish Broom

NNF & Prop 84 Big Tujunga Projects Removal of Spanish Broom

NNF & Prop 84 Big Tujunga Projects Removal of Spanish Broom

LA Conservation Corps Angeles National Forest Projects

Big Tujunga

Accomplishments – March 2013 to Present

- **Non-Native Vegetation Removal :**
Approximately over 40 acres of watershed improvement and restoration completed & 4.5 miles of stream improvements within the Big Tujunga Watershed
- **Trail Restoration**
Approximately 35 miles of trails have been restored within the Big Tujunga Watershed

2013 & 14 Accomplishments

Non-Native Vegetation Removal in the following areas:

- Spanish Broom removal performed within Trail Canyon
- Spanish Broom removal performed at Shortcut
- Spanish Broom removal performed off of Big Tujunga Road
- Spanish Broom removal performed at and around Camp 16 off of Mt C Gleason Road
- Sweet Clover removal at Mill Creek, starting at Monte Cristo CG working south
- Spanish Broom Removal performed on Josephine Fire Road
- **The main challenge is the amount of Poodle-Dog Bush the crews are working around while performing Spanish broom removal.*

COMMON CONSERVATION CORPS QUESTIONS

- What types of projects do you generally undertake?
- Where do you work?
- What specialized equipment do you have in-house?
- What is your response time for projects?

COMMON CONSERVATION CORPS QUESTIONS

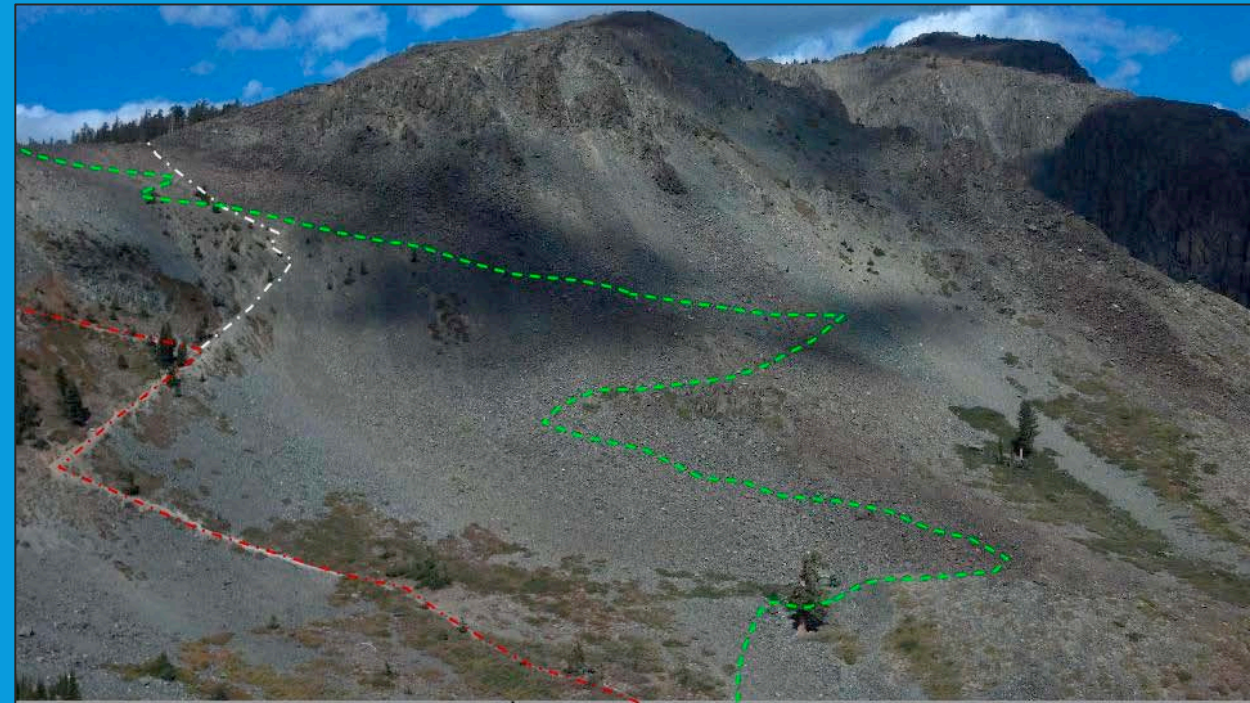

- How are your crews managed?
- What is your ability to work in the backcountry?
- Where do your crews sleep at night and how do they support themselves?
- Will you help us put together project proposals and grant requests?

KEY

- New Trail - built summer 2015
- Old Mt Tallac Trail
- Social Use Trail

Mount Tallac Trail Upper Re-route

This photo shows the old Mt. Tallac Trail in red and the social use trail in white. Both of these are to be replaced by the new trail in green. The crew finished the new re-route in August, 2015 and then decommissioned and rehabilitated these old trails in September, 2015.
