Any pesticide use that is not a home, structural, industrial, veterinary, or mosquito abatement use is considered this.
What is an agricultural use?
Conflict with labeling is a deviation from a pesticide’s product label except for this.
What is

- a decrease in dosage per unit treated
- a decrease in concentration
- less frequent application
- use to control a target pest not listed, provided the crop/site is listed
- using a method not expressly prohibited
- mixtures not expressly prohibited
- concentrations according to UCIPM
- PPE consistent with § 6738
An emergency care facility name, address, and this must be posted at the work site.
What is the phone number?
Employers must provide and assure that employees wear these 2 pieces of safety gear for nearly all types of applications.
What are eye protection (safety glasses) and (chemical resistant) gloves?
Employers must provide and assure that employees wear coveralls for these toxicity categories of pesticides.
What are danger and warning labeled pesticides?

(Also Category 1 and 2)
Clean water, soap, paper towels, and water sufficient for emergency eye and body wash is known as this.
What is a Handler
Decontamination Facility?
Handler Decontamination
Facilities must be provided for employees at this distance from a mix & load site when they use Danger or Warning pesticides for a non-production agricultural use.
What is 100 feet?
Centaurea solstitialis
What is yellow starthistle?
(also golden starthistle, St. Barnaby’s thistle, yellow cockspur)
Cynara cardunculus
What is artichoke thistle?
(also cardoon, desert artichoke, wild artichoke)
Carduus pycnocephalus
What is Italian thistle?
(also compact-headed thistle, Italian plumeless thistle, Plymouth thistle, shore thistle, slender thistle)
Carthamus lanatus
What is wooly distaff thistle?
(also false starthistle, saffron thistle, woolly safflower, woolly starthistle)
Most “thistles” are in the Asteraceae, except for *Salsola tragus*, which is in this family.
What is the goosefoot family or Chenopodiaceae?
Training for employees who will handle pesticides for the 1st time must be conducted at this time.
What is prior to handling a pesticide?
Training for pesticide handlers who have received preliminary training must be trained at this interval.
What is annually?
PSIS A-8/N-8 must be posted in a central location at the workplace for pesticide handlers. PSIS is an acronym for this.
What is Pesticide Safety Information Series?
Besides applicable PSIS and MSDS these records must be maintained in a Hazard Communication Information Center.
What are pesticide use records?
This is a specific topic that an employee must receive training on.
