Suppressing Exotic Weeds on Restoration Projects Using an Aggressive Herbaceous Understory

Tamara Sperber and F. Thomas Griggs
River Partners
1) Can we get them to germinate and grow?
2) Will they tolerate our maintenance activities?

100% Cover
1. Rapid-growing native herbaceous species can be **managed** to replace invasive exotics.

2. Future monitoring for the next 3 to 5 years will describe the long-term effectiveness of these plantings.
